

## Introduction to ArcGIS 9.1/9.2 Course Contents

### **Section 1: Introduction to ArcGIS 9.1/9.2 - Exercise**

Course Scenario .....	1-1
ArcCatalog .....	1-1
Launch ArcCatalog .....	1-1
Folder Connections .....	1-2
Preview Spatial Data.....	1-4
View Metadata.....	1-6
Preview a Data Table .....	1-6
ArcMap .....	1-7
Launch ArcMap .....	1-7
Add a Layer to a Data Frame.....	1-7
Add Multiple Layers to a Data Frame .....	1-9
Add a Layer to a Data Frame from ArcCatalog.....	1-9
Set Layer Data Source .....	1-10
Add a Layer from a Data Source to a Data Frame.....	1-11
Save the Map Document.....	1-12
Zoom to a Layer.....	1-13
Change Layer Drawing Order.....	1-14
Change Layer Symbology.....	1-15
Make a Layer Transparent.....	1-16
The Tools Toolbar.....	1-17
ArcGIS Desktop Help .....	1-18
Save the Map Document.....	1-19
Challenge .....	1-20

## **Module 2: Data and Projections - Exercise**

Overview.....	2-1
Data Frame Coordinate System .....	2-1
Map Units and Display Units (For ArcGIS 9.2 Users).....	2-2
Map Units and Display Units (For ArcGIS 9.1 Users).....	2-3
Measure the Study Area (For ArcGIS 9.2 Users) .....	2-5
Measure the Study Area (For ArcGIS 9.1 Users) .....	2-6
Add a Data Table to a Map Document .....	2-7
Add XY Data from an Access Database Table.....	2-8
Define the Coordinate System of the Access Table.....	2-9
Convert XY Data to Shapefile .....	2-11
Save the Map Document.....	2-12
Explore Shapefile Contents with Identify Tool .....	2-13
Symbolize with Single Symbol and Unique Values .....	2-14
Create/Save as Layer File .....	2-17
Remove Access Table ‘Events’ from Map .....	2-19
Review Map Contents.....	2-19
Save the Map Document.....	2-20
Challenge .....	2-20

## **Module 3: Editing Spatial and Non-Spatial (Attribute) Data - Exercise**

Overview.....	3-1
Heads-up Digitizing .....	3-1
Editing Attributes.....	3-4
Calculating Geometric Attributes (For ArcGIS 9.2 Users) .....	3-5
Calculating Geometric Attributes (For ArcGIS 9.1 Users) .....	3-6
Calculate Statistics .....	3-8
Edit Metadata .....	3-10
Challenge .....	3-14
Extra Challenge.....	3-18

## **Module 4: Analysis - Exercise**

Overview.....	4-1
Select By Attributes .....	4-1
Definition Query .....	4-3
Select By Location – Bears Near Housing .....	4-6
Create a Selection Layer .....	4-7
Evaluate Selection Results and Update Symbology .....	4-8
Select By Location – Bears Near Settling Ponds.....	4-8
Evaluate Selection Results and Update Symbology .....	4-10
Summarize Attribute Data .....	4-10
Analysis Results.....	4-11
Challenge .....	4-12

## **Module 5: Making a Map - Exercise**

Making a Map Layout.....	5-1
Basics of Map Design .....	5-1
Preparations for Creating a Layout.....	5-1
Rename Layers and Label Classes.....	5-2
Save the Map Document!.....	5-2
The Layout View .....	5-2
The Layout Toolbar .....	5-2
Use a Map Template .....	5-3
Manipulate Graphic Elements.....	5-3
Modify the Data Frame Contents.....	5-4
Modify the Map Legend .....	5-5
Modify the Map Text .....	5-8
Modify the Scale Bar .....	5-11
Modify the North Arrow .....	5-12
Add a Neatline to the Data Frame.....	5-13
Label Features .....	5-15
Save the Map Document!.....	5-20
Print a Map.....	5-21
Export a Map.....	5-22
Challenge .....	5-23
